A new leadership team for Tuck
Tuck educates wise leaders to better the world of business.
A preeminent business school that creates, teaches, and applies life-changing knowledge in a distinctly collaborative community based in Hanover and extending around the world.
Tuck is unique among elite business schools because we focus on areas of excellence -- the heart of which is an incomparable MBA Program -- that are distinctly personal, connected, and transformative.
Unmatched rigor and relevance of curricula.
An immersive, cooperative and supportive learning community that fosters inclusion, personal interaction and aspirational growth.
A modern learning environment that is both globally connected and technologically advanced.
Extraordinarily loyal and giving alumni network.
A rich quality of life.
Personal, Connected and Transformative: Tuck’s non-MBA Programs
Principles for Strategy Implementation

**Experimentation**

- To best achieve our strategy, let’s experiment a lot. Some experiments will be small. Others will be big.

**Inclusive Optionality**

- In knowing about the experiments include everyone, and in the design of these experiments include those who want to be (as much as possible).

**Relevance of Core Values**

- Personal, connected, and transformative ideally describes how every colleague describes their attachment to Tuck.
The “MESI” framework

M “Market”
What are other, relevant organizations doing? (academic, corporate, not-for-profit)

E “Empathy”
What do your stakeholders think, feel, need and want? (students, faculty, staff, students, clients, etc)

S “Strategy”
Does this initiative align with our mission & strategy? Is it personal, connected AND transformative?

I “Intuition”
What does your GUT tell you? What signals do you have that this is the right time to move forward?
Experiments in Action
